EXAMINER'S COMMENT

1. Applicant's election with traverse of the first species, readable on claims 17 through 19 and 21 in the reply filed on December 29, 2004 is acknowledged. The traversal is on the ground(s) that the special technical feature that is encompassed by base claim 17 is common to all of the named species. This is not found persuasive because, in making the restriction requirement, the examiner properly identified the distinct technical features for each of the disclosed species, as required.

The requirement is still deemed proper.

2. However, claim 17 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 20, directed to the non-elected species is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
